WELCOME TO FOREST ROAD FARM

At Forest Road Farm, our focus has always been on breeding high-quality velvet with clean, tidy characteristics and well-formed, round tops. We pride ourselves on selecting only the best Main Sires - both purchased and homebred - based on these market-driven attributes. However, our approach goes beyond the aesthetics of velvet. We place significant emphasis on breeding for larger body size, strong constitution, and excellent temperament, ensuring that our herd is well-equipped for long-term performance. While the current market conditions present challenges, we remain steadfast in our commitment to shaping the future of the velvet industry. We believe that genetics is not a one-year solution - it's about making strategic breeding decisions today that will define the herd we need in the next 5 to 10 years. By focusing on the long-term potential of our genetics, we aim to drive the industry forward.

We are excited to present a strong selection of progeny from our main sires, in this year's catalogue, including some of our latest genetics through the 20 yearling hinds being offered. These elite hinds include four exceptional individuals produced via embryo transfer, providing a rare opportunity to acquire the same high-quality genetics that form the foundation of our breeding program.

Lazarus continues to demonstrate an exceptional hit rate across a broad and representative cross section of our herd, reinforcing his status as one of the industry's top-performing velvet sires. His consistency and influence highlight the depth and reliability of our genetic program.

Notably, our sire **Kryptonite** has made a significant impact, producing heavy, high-performance 3-year-old sons. **Craftsman**, another standout sire, is quickly gaining a reputation for consistency in producing the quality velvet that the market demands.

We are also pleased to offer data-driven insights through our **BV** (Breeding Value) evaluations for both velvet and venison production. These metrics have become a valuable tool in refining our breeding decisions, and we're confident that the BV data supports the direction we've been taking. This reinforces our commitment to breeding the best genetics for both present and future market

WELCOME TO FOREST ROAD FARM (cont'd...)

needs.

The sale stags, on average, have produced an impressive 7.3kg of first-cut velvet (excluding two that have yet to be harvested), all while maintaining the style of velvet that is highly sought after in the marketplace. We are proud of what we have to offer and look forward to continuing our breeding program with the industry's future in mind.

We invite you to join us on **Tuesday, December 16th**, to experience the quality of our stock firsthand and enjoy some holiday hospitality. We are committed to the long-term success of the velvet industry and would love to share our passion for breeding and production with you.

Sincerely,
Grant & Sally Charteris

Welcome to Deer Select: we're onto it.

We're pleased to be able to add Deer Select data to the catalogue for the first time this year, which should help your purchasing decisions. At Forest Road Farm we have literally decades of deer production data, so it was a simple job to get that uploaded into Deer Select and have generations of our deer data analysed. The amount of back-data we provided ensured strong accuracy in the results and can be relied on to help inform our breeding decisions and yours as well.

These numbers reflect an animal's performance within our herd, and the strength in this data will increase as we build linkages with other stud and commercial herds, which allows Deer Select to compare the performance of genetics in different environments. We have already sold sires to commercial herds using Deer Select, which will provide some of those linkages.

FOREST ROAD FARM

www.forestroadfarm.co.nz

Welcome to Deer Select: we're onto it. (cont'd...)

Our AI programme will inevitably create more linkages, especially as more herds join Deer Select.

Without going into too much detail, the key information we've added to the catalogue for your consideration is a Mature Velvet Weight breeding value (MVW) and a Weight 12 breeding value (W12). There are layers of information in these numbers that connect generations of deer.

- Velvet: the MVW BV is a measure of how well this stag and his offspring will perform compared to the average animal within our herd. A stag with a MVW of 3.00kg is three kilograms of velvet ahead of the average stag. Mated to an "average" hind, his sons would be 1.5kg heavier than average... and he'd pass those same genetics to his daughters. That benefit is a permanent improvement for your herd.
- Bodyweight and growth: we have used bodyweight data to generate the W12 BVs as well. This is a continued focus for us, creating added value for stock by ensuring bodyweight and carcase weight are reflected in strong venison returns for you as well. Not every animal gets to make the velvet herd or the breeding mobs, so ensuring good growth rates and respectable carcase weights for those animals adds greatly to the bottom line. Nearly all the stags on offer this year have good positive growth rates, so they are truly all-rounders for commercial operations.

Please do bear in mind that the data only tells part of the story. Stockmanship should be what drives your initial choices and that is an individual thing: your eye for a nice animal, how he looks or holds himself, how he behaves, how you like his velvet style. We have made our choices for this line up, based on our eye for a top animal too. The Deer Select data will help inform those choices, as it doesn't currently account for velvet style, body conformation or temperament.

Buy with added confidence as these stags and selected yearling hinds have the breeding and data to genuinely make a difference in your herd.

HISTORY

Lazarus continues to amaze us with his sheer size and quality of velvet!

Not too many sire stags can reach this weight while maintaining competition winning style.

Lazarus sons are all near perfect SAP heads with no exceptions this year. Unfortunately we lost Lazarus last year.... this makes these sons and daughters very special!

Kryptonite 12.60kg @ 6yr

HISTORY

Kryptonite was purchased from Lindsay Tayles. As a 3yr old he cut 8.40kg (cut short) and after a shift and intense mating he cut a 9.56kg 4yr head that won the Hawkes Bay 4yr red section and came 2nd in North Island red section.

As a 5yr he has made a big jump to a massive 12.10kg. This year at 7yr he has jumped to 13.40kg!

Craftsman 11.40kg @ 8yr

HISTORY

We purchased Craftsman from Dalmore Deer by private treaty. We were looking for a very tidy outcross and this boy cut 7.80kg SAP @ 3yr and placed 9th in the 3yr National Velvet Competition! We rate his sire (Sven DDF) highly and as do we with Fergus who has been a prolific breeder for Dalmore, so Sven DDF over Fergus' dam was too good to pass up. This year he has jumped to a massive 11.40kg! This sire ticks every box!

Patriot @ 5 yr 9.50kg SA

HISTORY

Patriot was purchased as a 2yr old from Arawata Deer Stud. After his settling-in year he cut a perfect 4yr head of velvet. From then on he has had consistently high increases in his velvet weight, while holding his style.

Patriot's male progeny are like peas in a pod, with very dark and very correct velvet!

Patriot is now owned by the McCormick family.

HISTORY

Omar is a stag we purchased as a package deal from Tom Cruse when we bought Forbes. Omar was a 4yr old at the time and three things really stood out to put him in the sire category.

He is massive in size (matching up with Lazarus in the sire paddock), he has an extremely quiet temperament and, last but not most importantly, he has a beautiful style of traditional dark velvet that weighs heavy!

At 4yr (in his first season with us), he broke a coronet fighting in the roar, so therefore grows deformed velvet on that side! This is such a shame as he has such beautiful style! Omar is now owned by Simone Hoskin.

HISTORY

McLeod was purchased as Lot 1 Arawata 2023. He handled the shift, and semen collect, and mating and produced a massive 9.00kg SA head @ 3yr.

This year he jumped to a massive 11.40kg @ 5yr.

Very relaxed big bodied stag.

We used Amisfield as a 2yr sire over yearling hinds as he had such an attractive style of velvet. His depth of breeding is outstanding with Harlem combined with one of the most consistent bottom lines.

Amisfield cut 8.00kg of beautiful velvet at 3yr, which won the HB 3yr Velvet competition and placed 3rd in the NI. Last year Amisfield's stats were the top out of all the sires with 97.5% of his 2yr sons being retained by cutting over 4.00kg @ 2... they averaged 4.75kg @ 2yr!

HISTORY

Forbes 9.30kg SAP @ 6yr

We bought Forbes as a 3yr old from Tom Cruse. He has a gorgeous style of velvet and grows a very eye-catching head. Unfortunately, we couldn't obtain a full pedigree for Forbes but he was a standout in his peers. With velvet having such a strong heritability, I'm sure he will breed true to type and be a great outcross for us.

Forbes's sire 490 cut 9.60kg @ 3yr then died. His grand sire 224 has been an amazing sire for Tom. Forbes won the 5yr Red Velvet Section in the 2020 Hawkes Bay Velvet Competition and placed 3rd in the NI. This year he cut a stunning 9.30kg head as a 6yr old.

Forbes is now owned by Malcolm and Caroline Rau in Gisborne.

COMMENT:

Well, very similar to last year! One of the stars of the show is produced by mating our top 2yr olds over our yearling hinds, and the Forbes bottom line strikes again! This stag is unreal! He is quiet and cruisy, has beautiful velvet that is round all the way up to perfect tops! 070/22 was a 6.30kg 2yr old that was entered in the Rising Stars Velvet competition and used as a sire here last year. This pedigree is full of top Dams, 7182 is the G Dam of Lot 5 last year and 3316 is the Dam of Lot 8 (2019), which went on to cut huge weights for Nat Holmes - **Top Shelf**.

375/22 has produced a beautiful head of velvet. The beam is round all the way up and tops are perfect. Craftsman was purchased from Dalmore Deer for his perfectly round tops, which were backed up by his blue blood pedigree.

Dam 7302 is the Dam of 9433, who is the sire of two stags in this catalogue - Lot 15 and Lot 18

She is also the Dam of 634/21, who we sold as a yearling hind and have purchased back again!

Top stag with a top pedigree.

Gorgeous velvet on a fantastic sire with a bombproof pedigree!

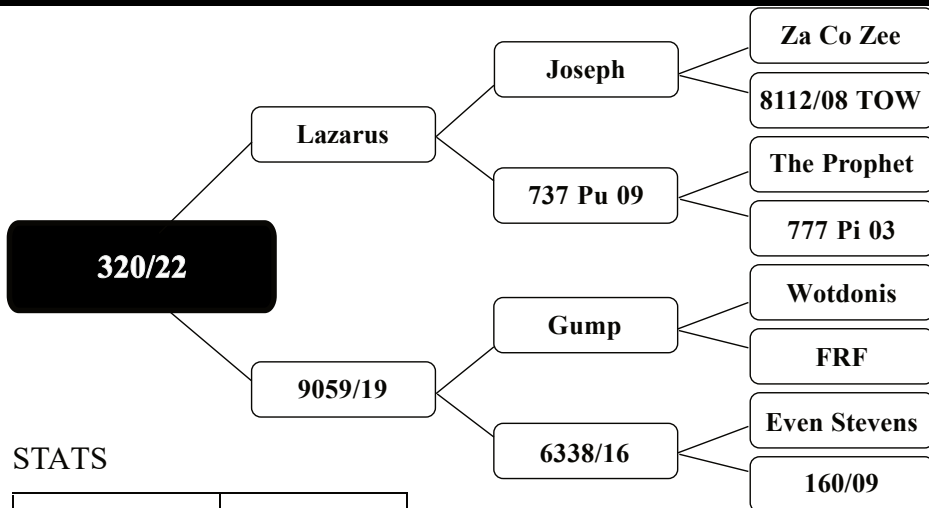

Omar over one of my favourite top producing hinds! 3071 is the Dam of Lots 4, 9, and 12 last year! All three of her ET sons made the sale!

When you put a hind of this calibre over another sire and she still produces a top sale stag, it really does show her worth and heritability.

Craftsman 11.40kg @ 8yr

COMMENT

Great young hind. Super tidy Craftsman over a powerful bottom line that goes back to 3086/13 who has been an ET hind for us with all her male progeny being incredible stags and all her female progeny retained for breeding. Two of her sons were in last years Sale!

Solid BV's across the board

Kryptonite 12.60kg @ 6yr

Very nice pedigree with Kryptonite over a young Amisfield hind. Amisfield had the best 2yr son velvet stats a few years ago and has bred very well.

Good velvet and growth BV's

COMMENT

New genetics over super consistent older bottom line that produced 10 offspring here all of which were retained either in the velvet herd or as a breeder. Strong BV's to match.

Forest Road Farm has had Numat rubber mats down for the best part of 6 years. Here's what Grant Charteris had to say about them.

"Numat rubber matting is the best money we have spent on the farm in years. We were having foot problems in our young animals and they have gone completely. The deer are quiet in the yards and best of all, we don't get as tired as you do when standing on a hard concrete floor all day."
